

The Bunkering & Sustainability Forum 2026

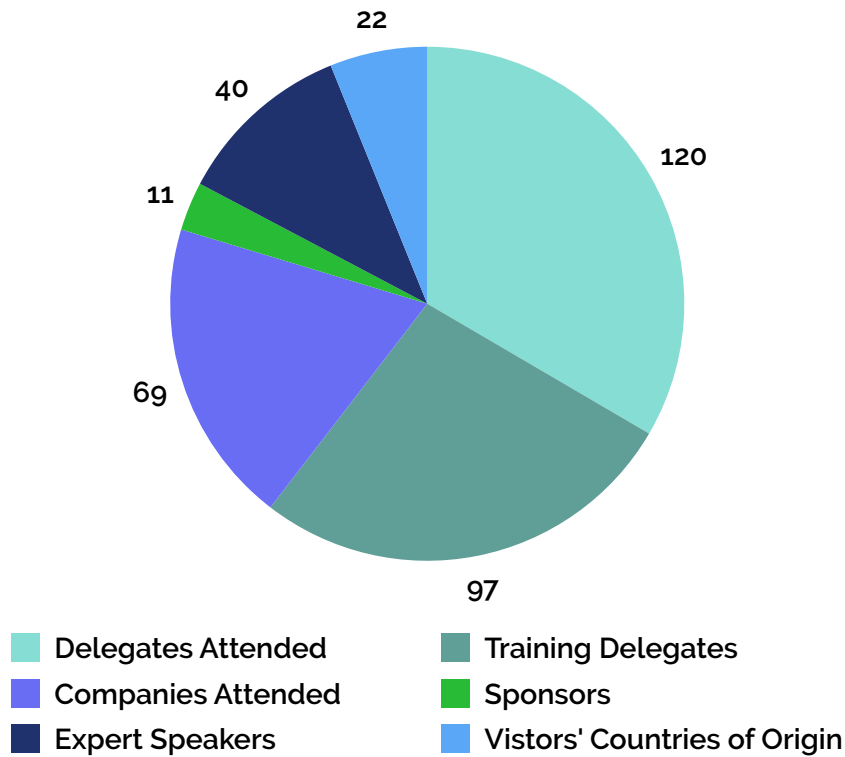

POST EVENT REPORT

Event Attendance

The pie chart illustrates the distribution of participation across five key categories at The Bunkering & Sustainability Forum. There were **120 delegates**, accounting for nearly half of the total and underscoring a strong level of engagement. A total of **69 companies** were represented, reflecting solid organisational involvement. Expert speakers contributed a meaningful share, enhancing the forum's professional depth and overall value. Additionally, the range of attendees' countries of origin highlights a strong level of international reach.

Countries Represented

- Andorra
- Belgium
- Canary Islands
- Denmark
- Finland
- Germany
- Italy
- Mauritius
- Netherlands
- Netherlands Antilles
- Nigeria
- Norway
- Portugal
- Republic of Korea
- Republic of Ireland
- Saudi Arabia
- Singapore
- Spain
- Switzerland
- UK
- United Arab Emirates
- USA

Conference Programme

17 March 2026

CONFERENCE - DAY ONE

08:00 Conference registration

WELCOME SESSION – BUNKERING & SUSTAINABILITY

09:00 This session will welcome delegates to the Canary Islands and to the inaugural Bunkering & Sustainability Forum in Santa Cruz de Tenerife.

SESSION ONE – COSTING COMPLIANCE: ADAPTING TO REGIONAL AND GLOBAL REGULATORY MANDATES

09:30 This session examines regional environmental regulations, including FuelEU Maritime and the EU ETS, focusing on impacts for island and small-port stakeholders.

SESSION TWO – ENERGISING CHANGE: WHAT ARE THE SHORT- AND LONGER-TERM OPTIONS?

11:00 This session will look at the range of energy options available to shipping, including alternative fuels such as biofuel, LNG, methanol, hydrogen and ammonia, as well as energy sources such as wind power, nuclear and shore power.

SESSION THREE – MAKING THE RIGHT CALL: PORT STRATEGIES FOR DECARBONISATION

12:15 This session explores which fuels are being prioritised by Tenerife and similar mid-sized ports, and why. It contrasts their approach with larger ports in Europe and Africa, focusing on planning, investment, infrastructure decisions, and whether funding models like subsidies and public-private partnerships are sufficient to support development.

SESSION FOUR – BRIDGING THE GAP: MATCHING FUEL SUPPLY WITH DEMAND

14:15 This panel explores the global energy transition in shipping. It examines ports evolving into energy hubs, challenges for fuel supply at smaller

ports, and how shipowners may adapt—such as increased bunkering frequency and potential bunker-only port calls.

SESSION FIVE – LNG BUNKERING: A CASE STUDY

15:30 This session will look more closely at LNG bunkering, from a commercial and operations standpoint, using LNG bunker deliveries to cruise vessels in the port of Santa Cruz de Tenerife as an example.

SESSION SIX – IN FOR THE LONG HAUL: FUTURE-PROOFING PORTS, SHIPPING AND FUEL INFRASTRUCTURE

16:30 This session will look at what makes a fit-for-purpose and future-proof maritime ecosystem. Speakers will look at terminal operations and 'smart ports', which increasingly rely on advances in digitalisation and AI. Options for vessel efficiency and optimisation will also be considered.

18 March 2026

CONFERENCE - DAY TWO

SESSION SEVEN – ONE-TO-ONE: AN EXECUTIVE VIEW

09:30 Pedro Suárez López de Vergara, President of the Port Authority of Santa Cruz de Tenerife will join Llewellyn Bankes-Hughes, CEO & Founder of ship.energy in a one-to-one conversation to reflect on the insights, ideas, and new information contributed by the conference speakers during the Bunkering & Sustainability Forum: Tenerife.

SESSION 8 – SHOWCASE TENERIFE

10:15 This session will focus on Tenerife and the decisions it has made, and will continue to make, in its ambitions to meet environmental regulations while still being able to offer global shipping the fuels and port facilities that it demands. The port will outline some of the clean energy and efficiency-enhancing initiatives it is undertaking in advance of a tour of the port's facilities and a boat trip to witness live bunkering operations.

Marketing

These posts showcase a coordinated event marketing strategy for The Bunkering & Sustainability Forum 2026. They use multiple angles to build awareness and credibility: announcing a key speaker (Jason Miles) to highlight expertise, promoting a platinum sponsor (Alfaship) to signal industry backing, and sharing a personal attendance post to create social proof and engagement. Consistent branding, clear event details, and strong calls-to-action (e.g., “Book Now,” “Register Now”) help drive visibility and encourage participation across different audience touchpoints.

A couple of days from now I'm heading to Tenerife for the Bunkering & Sustainability Forum..

I'm genuinely excited to learn more about the bunkering industry. Meeting new people and having real conversations about anything that comes up is what I'm really looking forward to. From my side, I'm happy to show **Bunker Suite** to anyone interested and hear your honest thoughts on how it's working for you.

#BASF26 should be interesting

See you in Tenerife.

Delegate Feedback

“A wonderful few days in Tenerife at #BASF26. It was great to get a closer look at the island, the port of Santa Cruz, and the local maritime and bunkering activity.

With many leading voices from the industry gathered in one place, the discussions around alternative fuels were especially valuable and informative for me.

All of this was set against a fantastic backdrop and, most importantly, matched by a warm welcome from the local community throughout.

Thanks to ship.energy, Autoridad Portuaria de Santa Cruz de Tenerife, Puertos de Tenerife, and all the other sponsors.”

- *Mounir Bendouch, Director at Bunker Suite*

“From my side, it was a privilege to share how the ELIRE Infra modular maritime systems infrastructure can unlock value, not just solve problems, enabling ports to move faster, reduce risk, and remain adaptable as the market evolves.

Great conversations, new connections, and strong momentum across the region. Looking forward to continuing discussions and turning insight into action.

Gracias Tenerife, stay beautiful, until next time.”

- *Luke Jenkinson, CEO & Founder - ELIRE Group*

“This kind of experience makes a real difference. It connects discussion with reality, aligns stakeholders and builds confidence in the capabilities of ports to deliver reliable and evolving energy solutions.

The feedback from attendees was clear: combining technical content with real operations creates true added value and elevates the impact of forums like this.

A sincere thank you to all sponsors and partners who made this possible. Tenerife continues to position itself as a place where conversations turn into action. Proud to be part of initiatives that move our sector forward.”

- *LUZ MARINA ESPIAU MORENO, Autoridad Portuaria de Santa Cruz de Tenerife. Puertos de Tenerife*

“Back from sunny Tenerife, where #BASF26 took place — and it was definitely worth the trip..

It was a great opportunity to meet experienced people from across the industry, hear different perspectives, and learn more about bunkering. I'm coming back with useful insights and a better understanding of the industry.

And of course, it was a lot of fun too. Antonio Rebelo also captured a few great moments with Nigel Draffin, Alejandro Morales Moreno, Amanda Tommasini, Christos Polychronopoulos, and me.

Glad to have represented Bunker Suite there.”

- *Oleksandr Kopiika, Sales Representative, Bunker Suite*
