ship.energy summit 2026

EVENT DETAILS

Date: 2 June 2026

Venue: Eugenides Foundation, Athens, Greece

Theme: Keeping it real – setting out pragmatic ambitions for maritime decarbonisation

Format: **Summit style conference** - With sessions focusing on, effectiveness of penalty/incentive approaches to the industry's transition to new energy sources.
Networking Events - drinks reception, lunch, and curated meet-ups to forge new connections

The ship.energy Summit 2026 (SES26), taking place in Athens, will bring together global maritime stakeholders to assess the realistic progress of shipping decarbonisation. Following delays to the IMO's Net Zero Framework, the event will explore whether the industry can maintain momentum toward its greenhouse gas reduction targets.

Discussions will focus on practical solutions such as cleaner fuels, operational efficiencies, and digitalisation, with particular attention on the challenge of decarbonising existing vessels. The summit will also examine the impact of European regulations, incentive and penalty mechanisms, and whether the European Commission's Industrial Maritime Strategy is providing the confidence needed to sustain investment and collaboration across the sector.
