ship.energy summit 2027

From local to global: the impact of regional innovation on maritime decarbonisation

19-20 April 2027

Marseille, France

#SES27

Sponsorship opportunities

WHY ATTEND SES27?

This year's ship.energy summit (SES27) will explore the benefits and challenges of regional approaches to maritime decarbonisation. Industry experts will discuss how local advances in fuels and technology can accelerate the global energy transition through collaboration and knowledge sharing.

Panellists will examine how public and private finance can help maritime businesses bring new ideas to market and scale them up. Pilot projects and green shipping corridors in France and across Southern Europe will show what this looks like in practice.

The summit will also explore where regional regulation helps or hinders progress ahead of global greenhouse gas rules. Discussions will cover EU policy, fuel certification, voluntary carbon markets and how emissions reporting shapes business and supply chain decisions.

Venue TBC
Marseille, France

WHO ATTENDS?

- Shipowners, Operators & Charterers
- Ports, Terminals & Port Authorities
- Marine Fuel Producers, Bunker Suppliers & Traders
- Energy Companies & Alternative Fuel Developers
- Shipbuilders & Marine Equipment Suppliers
- Clean Technology & Energy Providers
- Classification Societies & Fuel Certification Bodies

Group rates available:
Remember to ask about the special rates for multiple delegates from the same company.

SES26 BY THE NUMBERS

The 2026 ship.energy summit in Athens took stock of efforts to decarbonise shipping and ports. Following the pause in adopting the IMO's Net Zero Framework, industry leaders discussed whether the sector could sustain momentum, work together and meet the IMO's emissions targets.

Discussions focused on what was achievable for conventionally fuelled ships already in service and how European regulation, incentives and penalties shaped investment decisions. Case studies and projects from across Southern Europe showed where progress was being made.

Information on the **ship.energy summit 2026** agenda and speaker line-up can be found here

ADVERTISING

Magazine print advertising

ship.energy magazine delivers authoritative, high-quality insight for professionals across the international bunker industry, providing a comprehensive, accurate, and independent perspective on the global marine fuels market. The publication keeps readers informed of industry developments, emerging trends, and advances in vessel and fuel-efficiency technologies, alongside port and regulatory initiatives shaping the energy transition.

ship.energy Premium Membership includes both print and digital editions of ship.energy magazine. Widely regarded as the industry's journal of record, the magazine is published on a bi-monthly basis.

Distribution spans paid subscribers, carefully targeted organisations receiving complimentary copies, and circulation through partnerships with leading industry events.

Our readership represents a broad cross-section of the maritime sector, including shipowners, charterers, port authorities, class societies, bunker suppliers, traders, and maritime law firms.

ship.energy magazine delivers essential insight into market developments, technology trends, and next-generation fuels, serving as a go-to intelligence source for the marine fuels industry
